

# Windows-Installation

1) Laden Sie die CORAYE-Software vom Dashboard herunter

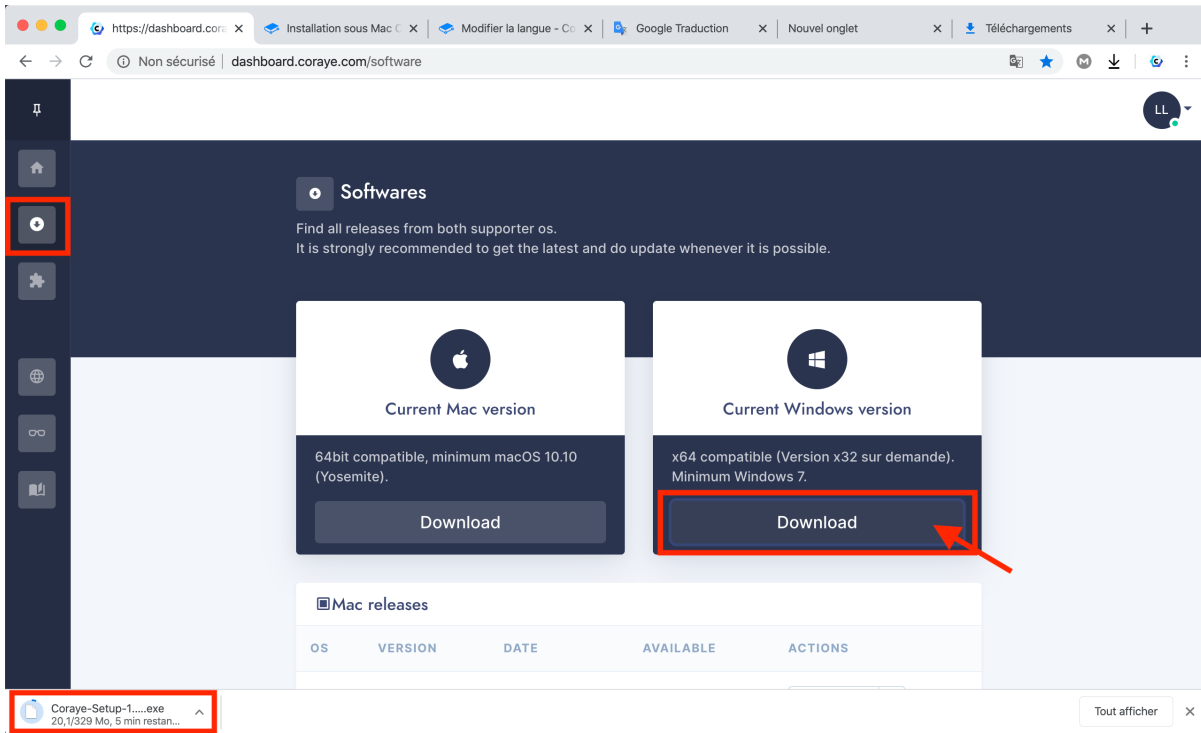

Weitere Informationen finden Sie im Kapitel: [Support-Download](#)

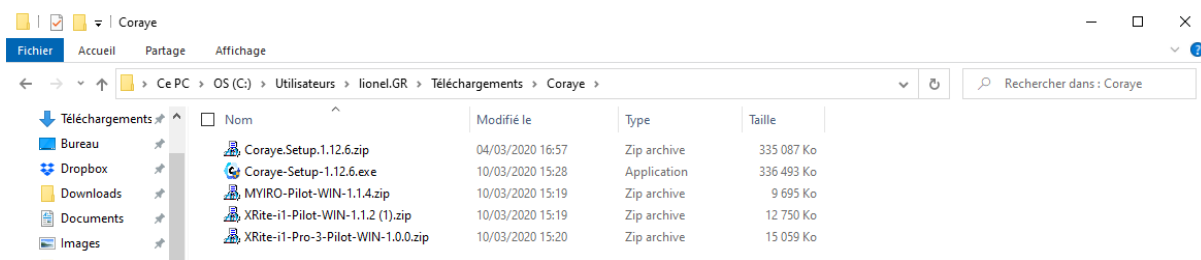

The screenshot shows the CORAYE software dashboard. The left sidebar contains navigation links: Home, **Softwares** (highlighted with a red box), Plugins, Website, Blog, and Documentation. The main content area is titled "Softwares" and includes a sub-header "Find all releases from both supporter os. It is strongly recommended to get the latest and do update whenever it is possible." Below this, there are two main sections: "Current Mac version" and "Current Windows version". Each section has a "Download" button. The "Current Mac version" section specifies "64bit compatible, minimum macOS 10.10 (Yosemite)". The "Current Windows version" section specifies "x64 compatible (Version x32 sur demande). Minimum Windows 7." Below these sections is a table titled "Mac releases" with columns for OS, VERSION, DATE, AVAILABLE, and ACTIONS. The table contains one row for version 1.12.6, dated 3/6/2020, with an "Available" status and a "View Logs" button.

OS	VERSION	DATE	AVAILABLE	ACTIONS
🍏	1.12.6	3/6/2020	Available	View Logs

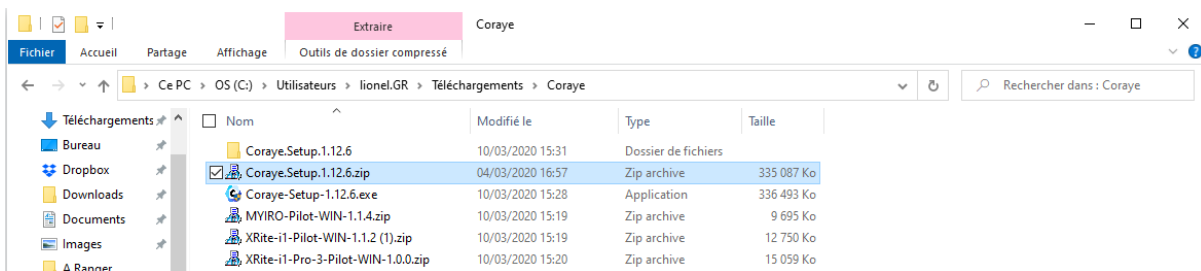

Klicken Sie auf die Schaltfläche "Download", um die CORAYE-Software herunterzuladen.

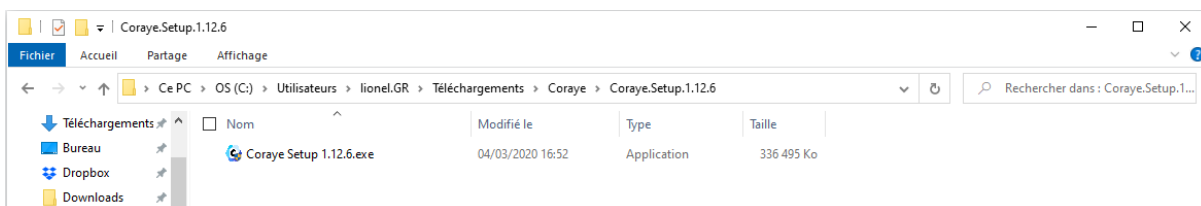

Die Datei "Coraye.Setup.XXXzip" wird heruntergeladen

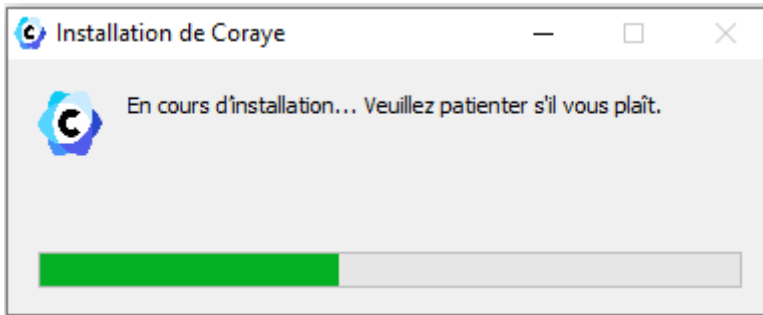

## 2) Entpacken Sie die Datei "Coraye.Setup.XXXzip"

Doppelklicken Sie, um die Installation von Coraye zu starten

---

### 3) Starten Sie die CORAYE-Software

Die CORAYE-Software wird gestartet und Sie müssen sich mit der E-Mail-Adresse und dem Passwort Ihres CORAYE-Kontos verbinden (dasselbe, das Sie für den Zugriff auf Ihren persönlichen Bereich im Dashboard verwendet haben).

---

### 4) Lizenzaktivierung

Weitere Informationen finden Sie im Kapitel: [Lizenz aktivieren](#)

---
